TITANIUM NAIL PRODUCTS

If you have a Ti nail, the very first thing you should do is get it red hot and let it cool down several times to build an inactive α -case layer on the surface. Titanium by itself is highly reactive when heated and until you build the α -case, you will taste the hot Ti definitely.

Adjustable Titanium Nail is CNC machine made .The craftsmanship behind this titanium nail makes it perfect for retaining heat under pressure and capable of being torched multiple times with out corroding.This is the best Titanium Nail to use for dabbing.

Process	CNC
